INSTRUCTIONS FOR ORDERING REPLACEMENT PARTS

To obviate any delays through mis-interpretation of orders it is important that you make careful note of the following instructions:—

DESCRIPTION

The part required should be referred to in the catalogue and the part number quoted with the technical description. If any doubt exists as to the name and number of the part a sketch or the old part should be sent to assist in correct interpretation. When trim material is ordered, a specimen of the material required should be sent whenever possible.

PATTERNS

When parts are sent as patterns it is important that they should be carefully and individually labelled indicating the address of the sender together with advice by separate post giving any reference or order number to which they refer. All patterns must be sent Carriage Paid to the Spares Division, Fletchamstead Highway, Coventry, and unless special instructions are given on the order they will not be returned.

RIGHT AND LEFT HAND PARTS

Where Right Hand and Left Hand Parts are required it is essential that this is clearly stated on the order.

QUANTITIES

Do not designate the quantities by sets but state specifically the number of parts that are required.

ORDERS

Orders for replacement parts should be submitted to the nearest Standard Distributor or Dealer.

SPECIAL NOTE FOR DISTRIBUTORS

It is helpful to ensure that:—

- (a) The address is clearly stated and the order submitted on the approved Order Form.
- (b) Parts required are in numerical sequence.
- (c) Where possible, the order should be typed or written in ink.

NOTICE OF MODIFICATION

When modifications relevant to these models are introduced Bulletins will be issued to Standard Distributors and Dealers to ensure that the catalogue may be amended in accordance with the latest information.

CHASSIS NUMBERS

Where there is doubt about the correct description for a spare part, always quote the chassis number with prefix or suffix letters (if any) of the car concerned. This will save delay and ensure speedier despatch. The chassis number may be found stamped on a brass plate, on the scuttle under the bonnet.

CAR REPAIRS. Note to Customers

A Service School is established where the representatives from our Distributors and Dealers are trained in the upkeep and maintenance of Standard Cars. Customers should therefore avail themselves of the service which our agents are able to give in all matters relative to service and maintenance.

CAUTION
